

Luxury doesn't come at a better price!

America's best spa value.

Helping you to achieve a more enjoyable lifestyle.

What a wonderful feeling to nestle down into your nice, warm, soothing Viking Spa.

The massaging effect of the jets, coupled with the healing properties of hot water, make you want to never leave. Whether alone, with that special someone, or together with family, a Viking spa is a great place to be.

Once you begin using a spa ... you'll find that the best advantage of its use is the way you feel empowered to handle the "daily grind" of a long day.

Backyard family vacations will draw everyone in your home closer together. You'll sleep better, you'll feel better and, yes, a spa has also been proven to re-ignite passion that sometimes gets lost in the hustle and bustle of today's lifestyle.

A spa will heal body, mind and spirit. Each time you ease into your Viking Spa there will be a quick transformation from stress to peaceful bliss!

It all adds up to Viking Spas.

In the early 1970's, Viking Spas brought to the spa industry the first affordable portable round spa. Building one spa model meant one thing, quality control.

Today, Viking continues to live by the rule of keeping it simple. We have expanded our spa line to offer only four models, which we build in two to three different ways. Every one of these models has been specifically designed to attract the consumer who is looking for a therapeutic spa at an affordable price.

In the 1980's, it was common for people to boast about how much they spent on a purchase. But times change. Now consumers research the features they need in a product and purchase according to the one that best meets these needs.

At Viking, we strive to provide the highest quality spas at the most affordable price. Our spas are one of the most energy efficient in drawing the least amount of electricity, while still maintaining optimal water jet pressure. It is our commitment to provide the best value that has earned Viking Spas an impeccable reputation within the spa industry and gained us affiliations with some of the largest retailers in North America.

Viking is now distributing internationally and is easily repeating its success in other countries. We find that all people, no matter where they live, still desire the same thing ... the best product for the best price.

Rest comfortably: a virtually indestructible spa.

All Viking Spas are made with Fortiflex™ High Density Polyethylene (HDPE). Viking then coats the underspa with heavy poly-urethane two-pound density foam to provide ultimate support to load-bearing areas and provide layers of thick insulation. In other words, a Viking Spa easily has more than the insulation required for a home in the coldest parts of the United States.

- Viking is able to offer a lifetime warranty on our spa shell due to the superior construction and the benefits of Fortiflex™ HDPE.*

- Our 6 year Parts & Labor Warranty is further evidence of our confidence in our product.*

Go ahead, ask around to see if other manufacturers back their product like we do ours.*

* Ask your dealer for the details of our Viking Warranty.

6
Lifetime

Apples to Apples / Oranges to Oranges.

Viking engineers their spas void from over-complicated products that are a source for problems down the road. Instead, our spa utilizes all of the latest technologically advanced materials that offer strength and important maintenance-friendly or even maintenance-free benefits. From our virtually indestructible Fortiflex™ spa shell, to our Vikashield™ cabinet, to our solid-state Balboa® Control System with its many automatic mode settings, sit back and enjoy while your spa takes care of you.

Viking Spas two inch high-flow PVC plumbing manifold system disperses water evenly throughout the spa. This design significantly increases jet pressure in comparison to spas with lines running from jet to jet. Rather than use diverters that move water pressure to different areas or “zones” of the spa, Viking has plumbed their spas to provide all the power to the individual jets ... all the time! This means never having to “soak” while others use the spa or conversely never “hogging” the therapy while loved ones sit waiting their turn.

Whirlpool

Features that feature / benefits that benefit.

Most second time spa buyers will tell you they don't need all the "bells and whistles" they purchased with their first spa.

Essentially, a spa is personified by the power of the therapy and the dependability of its components.

We exclusively use Waterway pumps on all Viking spas. In the Supreme, Legacy & Xtreme Series, we use Waterway's Executive Series 56 frame pump. The Executive Series runs as much as 50% cooler than the commonly used 48 frame pump and is also one of the most energy efficient in the industry for its size.

The Vikashield™ cabinet gives the look of wood but offers a "Zero Maintenance", colorfast material that never needs refinishing or staining. The solid-wall design also provides for excellent insulating and reduction of equipment noise.

Viking spas are also available with a 5.5 kilowatt heater! This is a very important feature that separates us from many spa brands. With a higher kilowatt heater your spa will heat up faster and most importantly maintain the exact temperature you like to relax with.

Lastly, Viking Spas has set a new industry safety standard in single 4 or 5 hp pump systems by using two bottom side suction in conjunction with pool-style weir skimmer on all of our spas. Rest comfortably knowing that we place our own children in our spas and know what it takes to make them safe. That is why we are proud of our ETL listing.

The Royale, Legacy II & Xtreme Privilege!

Go ahead, spoil yourself.

Already, you have probably realized, that when it comes to affordability, the Viking Spa is a perfect choice. Let us say that, with our outstanding warranties and performance, you may never have a reason to replace your Viking. With this in mind, we've placed some outstanding features in our Royale, Legacy II and Xtreme spas for you to consider: extra therapy, stainless steel jets, LED mood lighting, and a lighted, cascading waterfall. These features are installed to offer a great value package. Individually priced, you would pay significantly more for these features in other spa brands.

Once again, we ask you to shop and compare.
